

Dust-Buster®

RDC-8020 Residual Dust Suppressant

Dust Suppressant Foam Designed for Material Handling and Processing Systems

Unlike conventional dust suppressants, which control dust at a point source, RDC-8020 possesses a residual effect and not only reduces dusting at point of application, but throughout downstream operations as well. This means that an RDC-8020 system will reduce the cost of dust control by eliminating the need for separate conventional systems installed at each dust producing operation.

Appearance	Yellow to Tan Liquid
Odor	None
Density @ 77°F	8.8 lb/gal (Typical)
Specific Gravity @ 77°F	1.06 (Typical)
Viscosity @ 70°F	260 cps (Undiluted)
pH (Undiluted)	7.0
Flash Point	Not Applicable - Aqueous Based Solution
Freezing Point	28°F
Packaging	Available in Bulk, Drums and Totes
Handling	Store and Use at Temperatures Above 40°F
